POTTER HEAD

Idea: Basic idea of the web site is to create a page where we can find every detail of the merchandise (in here I'm taking the example of Harry potter) in this way we can create for any other pages. This will be a fan page not the one official.

Features: In this web site I'll be adding books, movies, trailers and updates regarding harry potter. So, it will be a feast for every harry potter fan. And I will provide hyperlinks to the movies and add YouTube videos in one page. So, they can play trailers on the page itself.

Purpose: I'm a great fan of harry potter and in this course, I need to learn good and quick. If I choose this subject as my project then it will be easy for me to cope up and do the entire project on my own without using templates online.
